System requirements : It supports Windows 8, Windows 10 and any above standard and professional version

BADGE PRINTER

Customizable Printing for visitor badge on any windows color or thermal badge printer.

ENHANCE SECURITY

Security Breaches can occur when facilities on rely logbooks.

INTEGRATION

System is capable to integrate with any existing access control where we can able to provide access for visitors

SAFETY INDUCTION

It is mandatory in industries to see the safety induction video or terms and conditions and its best was to educate the visitor through video and after that issue the visitor pass.

ON-LINE / ON-SITE

System is capable to book the predefined visits through portal or link and the same time it is capable to allow visitor to visit onsite and fill the form to visit through touchless technology.

COMPREHENSIVE DASHBOARD

VisitHub has provided comprehensive live dashboard to check live status of the reception area and if there is more visitors, manager can arrange more team to handle the numbers properly.

WELL SECURED

System is completely secured and has better options to check and track each individual with having the permission even to block the access card any moment.

INDUSTRIES

This system can be utilized at any corporate offices, Healthcare, Government offices, Manufacturing industries, Education, Oil and Gas, Free Zones, Insurance sector, Banks etc.

VisitHub process the visitors in 3 to 7 seconds. Track frequent visitors easily and fast approval process. Scale-able from stand alone to multiple workstation and multiple locations and geographical area. It also caters multiple tenants in a single building with each tenant accessing their own records.

Visitor management is the front end tool to streamline the process by utilising the smart application. It can provide first impression to visitor about the technology being utilized by host company. Many organization are still depending on manual pen and paper process, with many limitations like time waste, no tracking, no control on visitor, no access control sync, does not show effective impression to visitors. VisitHub provides excellent automation based on QR code to improve our client image with touchless solution.

VisitHub provides Email and SMS notification to employee when visitor is checked in or check out at front desk. One click report of who is in the building at any given time, particularly useful in emergency situations
